  Rane Group is an Automobile Manufacturing Parts Company they sell Rane parts to the Rane Customers. In this app we are creating Job Card for Part fault to be repaired. Parts comes from Manufacturing Companies like Ashok Leyland, Tata and send to Rane Company and sell Rane parts to the Dealers i.e Showrooms. If a customer gets fault in parts the come to supplier and identify the part which company it is. If it is Rane then they will create a Job Card for Rane and they will fix the part and sent back to supplier and Customer. Technologies used for Front End: Ionic Angular. For Backend ASP.NET, MSSQL.

- ✓ **Paper Manufacturing Application – Instant Host Technologies**

  Created a paper manufacturing application of TNPL for manufacturing papers for dealers all over India of our branches. Products like Paper, Packaging Boards and Cement. Displaying a list of products with details, filtering the product from list of products by selecting an application and GSM value, Displaying Farmer Profile with details like Normal Details, Location Details and Bank Details in Tamil Nadu, Displaying list of Plantations with Details, Displaying list of Wood Harvest with details like Land Size, Acres, Patta, Survey, Area Type, etc... in Tamil Nadu. Displaying list of Dealers with details in Tamil Nadu and Other States. Technologies used Front End Languages: Ionic, Angular, Bootstrap. For Back End Languages: ASP.NET, MSSQL.

- ✓ **Citris Financial Web Application – Instant Host Technologies**

  For taking a loan We have to check our rate, They check our credit report with traditional credit bureaus like TransUnion, Experian or Equifax. This initial (soft) inquiry will not affect our credit score. If we accept your rate and proceed with our application, They do a separate (hard) credit with Clarity. This hard inquiry will not impact our credit score with the traditional credit bureaus but may impact our credit score with Clarity. Funds will be sent the next business day if we accept our loan.Our Application are able to complete the application process automatically without providing additional supporting documents. Loan processing may be subject to longer wait times if additional documentation is required for review. Loan amounts range from $1,000 to $5,000. Annual Percentage Rates range from 34.95-35.95% with a loan term of 36 months. If approved the actual loan amount, term, and APR may vary based on credit determination and repayment method. Technologies Used For Front End Languages: Angular, CSS. For Backend Languages: ASP.NET, MVC, MSSQL.

- ✓ **Bus with food Selection Application - Myself**

  Created a bus application for Ticket booking by passengers with seat reservation and food selection for introducing some of the new bus which provides food with free water bottle with pantry and toilet. Technologies Used for Front End: React JS, CSS. For Back End: Python, Django, MySQL.
